## Dividing by **1-12**

### Directions

- Every row, column, and 3-by-2 box  should contain each of these digits:

**1 2 3 4 5 6**

- Fill in each blank with the correct number to complete the fact.

$7 \overline{)7}$	$7 \overline{)42}$	$\underline{\hspace{1cm}} \overline{)10}^2$	$\underline{\hspace{1cm}} \overline{)4}^1$	$\underline{\hspace{1cm}} \overline{)12}^6$	$4 \overline{) \underline{\hspace{1cm}} 6}^9$
$\underline{\hspace{1cm}} \overline{)24}^{12}$	$\underline{\hspace{1cm}} \overline{)40}^{10}$	$9 \overline{)27}$	$9 \overline{)54}$	$11 \overline{) \underline{\hspace{1cm}} 5}^5$	$7 \overline{)2 \underline{\hspace{1cm}}}^3$
$\underline{\hspace{1cm}} \overline{)24}^8$	$\underline{\hspace{1cm}} \overline{)20}^4$	$4 \overline{)3 \underline{\hspace{1cm}}}^8$	$9 \overline{)8 \underline{\hspace{1cm}}}^9$	$7 \overline{)8 \underline{\hspace{1cm}}}^{12}$	$8 \overline{)5 \underline{\hspace{1cm}}}^7$
$8 \overline{)48}$	$12 \overline{)12}$	$9 \overline{) \underline{\hspace{1cm}} 5}^5$	$\underline{\hspace{1cm}} \overline{)30}^6$	$\underline{\hspace{1cm}} \overline{)18}^6$	$\underline{\hspace{1cm}} \overline{)14}^7$
$\underline{\hspace{1cm}} \overline{)55}^{11}$	$8 \overline{) \underline{\hspace{1cm}} 4}^3$	$12 \overline{)9 \underline{\hspace{1cm}}}^8$	$\underline{\hspace{1cm}} \overline{)9}^3$	$\underline{\hspace{1cm}} \overline{)8}^8$	$\underline{\hspace{1cm}} \overline{)40}^{10}$
$3 \overline{)12}$	$9 \overline{)6 \underline{\hspace{1cm}}}^7$	$3 \overline{)33}^1$	$8 \overline{)16}$	$1 \overline{) \underline{\hspace{1cm}}}^6$	$\underline{\hspace{1cm}} \overline{)40}^8$

## Divide With Things Around the Room

**Directions:** Solve the following problems using counters of your choice, such as dry beans or any other counter you find around the room.

### Example

At a dog show, there were 20 poodles in teams of 5. How many teams were there? 4

- The Old Maid dealt 12 cards to 2 players.  
How many cards did each player get if they all got the same number of cards? \_\_\_\_\_
- In a field were some happy cows. Ali, the farmer, counted 36 feet on the cows. How many cows were in the field? \_\_\_\_\_
- Prince Charming had 14 crowns in his closet. There are 2 crowns on each shelf. How many shelves did Prince Charming use for his crowns? \_\_\_\_\_
- When Mother Hubbard went to the cupboard, she found 21 cookies. If she feeds 3 cookies to each of her children, how many children can Mother Hubbard feed? \_\_\_\_\_
- Snow White's 7 dwarves had a successful day. They mined 28 diamonds. If the dwarves share the diamonds equally, how many does each one get? \_\_\_\_\_
- There are 18 frogs that want to play baseball.  
How many teams can be made with 9 on a team? \_\_\_\_\_
- Richard the Rhino bought 9 cans of tennis balls. There were 27 balls with an equal number of balls in each can. How many balls were in each can? \_\_\_\_\_
- The Jolly Green Giant grows peas.  
There are 6 peas to a pod. How many pods are needed to contain 42 peas? \_\_\_\_\_
- In an amusement park, Mark fed the great white shark 16 sardines.  
He fed it two sardines at a time. How many times did Mark feed the shark? \_\_\_\_\_
- Ellie, an accomplished elephant and golfer, shot 12 strokes in all.  
She scored 3 strokes on each hole. How many holes of golf did Ellie play? \_\_\_\_\_

Name \_\_\_\_\_ Date \_\_\_\_\_

## Test Your Guess

**Directions:** Follow these steps to test and check your division smarts:

- 1 Guess how many times the divisor can be subtracted from the dividend. Write your answer next to *Guess*.
- 2 Test your guess on the calculator: Subtract the divisor from the dividend as many times as is possible. Write the number of times you subtracted next to *Test*.
- 3 Write *yes* or *no* to show whether you guessed right.

- |                |             |            |                       |
|----------------|-------------|------------|-----------------------|
| 1. $9 \div 2$  | Guess _____ | Test _____ | Were you right? _____ |
| 2. $20 \div 5$ | Guess _____ | Test _____ | Were you right? _____ |
| 3. $37 \div 7$ | Guess _____ | Test _____ | Were you right? _____ |
| 4. $12 \div 2$ | Guess _____ | Test _____ | Were you right? _____ |
| 5. $21 \div 3$ | Guess _____ | Test _____ | Were you right? _____ |
| 6. $18 \div 5$ | Guess _____ | Test _____ | Were you right? _____ |
| 7. $48 \div 9$ | Guess _____ | Test _____ | Were you right? _____ |

**Directions:** Now, circle the four combinations that have leftovers.

Name \_\_\_\_\_ Date \_\_\_\_\_

## What's Left?

**Directions:** Answer the division combinations below. Then sort them by their remainders in the Leftovers section below. Use counters or other classroom materials.

### Example

$$23 \div 4 = 20r3$$

$$62 \div 9 = \underline{\hspace{2cm}}$$

$$11 \div 3 = \underline{\hspace{2cm}}$$

$$18 \div 5 = \underline{\hspace{2cm}}$$

$$48 \div 7 = \underline{\hspace{2cm}}$$

$$51 \div 9 = \underline{\hspace{2cm}}$$

$$20 \div 7 = \underline{\hspace{2cm}}$$

$$47 \div 6 = \underline{\hspace{2cm}}$$

$$53 \div 9 = \underline{\hspace{2cm}}$$

$$47 \div 8 = \underline{\hspace{2cm}}$$

$$72 \div 8 = \underline{\hspace{2cm}}$$

$$28 \div 4 = \underline{\hspace{2cm}}$$

$$24 \div 5 = \underline{\hspace{2cm}}$$

$$36 \div 8 = \underline{\hspace{2cm}}$$

$$11 \div 4 = \underline{\hspace{2cm}}$$

$$40 \div 6 = \underline{\hspace{2cm}}$$

$$44 \div 9 = \underline{\hspace{2cm}}$$

$$11 \div 9 = \underline{\hspace{2cm}}$$

$$56 \div 7 = \underline{\hspace{2cm}}$$

$$23 \div 6 = \underline{\hspace{2cm}}$$

$$18 \div 8 = \underline{\hspace{2cm}}$$

$$79 \div 8 = \underline{\hspace{2cm}}$$

$$35 \div 6 = \underline{\hspace{2cm}}$$

$$43 \div 9 = \underline{\hspace{2cm}}$$

### Leftovers

# Quick Thinking

**Directions:** Use the strategies you've learned to answer division combinations almost instantly. Remember the following strategies:

- Zero the Hero: When 0 is the dividend, the answer is 0.
- Easy 1s: When a number is divided by 1, the answer is that number.
- A Number Divided by Itself: When a number is divided by itself, the answer is 1.
- Give Me Half!: Dividing a number by two is the same as splitting it in half.
- Speedy 9s: When a number is divided by 9, the answer is one more than the tens digit in the dividend.

1.  $1 \overline{)2}$

6.  $9 \overline{)9}$

11.  $6 \overline{)0}$

16.  $4 \overline{)4}$

2.  $7 \overline{)7}$

7.  $1 \overline{)0}$

12.  $1 \overline{)1}$

17.  $9 \overline{)81}$

3.  $1 \overline{)8}$

8.  $9 \overline{)63}$

13.  $1 \overline{)6}$

18.  $9 \overline{)36}$

4.  $9 \overline{)27}$

9.  $8 \overline{)0}$

14.  $2 \overline{)0}$

19.  $1 \overline{)9}$

5.  $3 \overline{)0}$

10.  $3 \overline{)3}$

15.  $9 \overline{)18}$

20.  $9 \overline{)72}$

21.  $2 \div 2 = \underline{\hspace{2cm}}$

28.  $0 \div 9 = \underline{\hspace{2cm}}$

35.  $5 \div 5 = \underline{\hspace{2cm}}$

22.  $45 \div 9 = \underline{\hspace{2cm}}$

29.  $36 \div 9 = \underline{\hspace{2cm}}$

36.  $54 \div 9 = \underline{\hspace{2cm}}$

23.  $0 \div 1 = \underline{\hspace{2cm}}$

30.  $5 \div 1 = \underline{\hspace{2cm}}$

37.  $4 \div 1 = \underline{\hspace{2cm}}$

24.  $0 \div 5 = \underline{\hspace{2cm}}$

31.  $1 \div 1 = \underline{\hspace{2cm}}$

38.  $8 \div 2 = \underline{\hspace{2cm}}$

25.  $3 \div 1 = \underline{\hspace{2cm}}$

32.  $6 \div 2 = \underline{\hspace{2cm}}$

39.  $0 \div 9 = \underline{\hspace{2cm}}$

26.  $27 \div 9 = \underline{\hspace{2cm}}$

33.  $0 \div 4 = \underline{\hspace{2cm}}$

40.  $0 \div 7 = \underline{\hspace{2cm}}$

27.  $6 \div 6 = \underline{\hspace{2cm}}$

34.  $45 \div 9 = \underline{\hspace{2cm}}$

41.  $63 \div 9 = \underline{\hspace{2cm}}$

## Everyday Problems Use Division

**Directions:** Solve the problems below. Write your answer on the line and the fact you used in the circle.

1. It takes 7 coins to fill a page in Juan's coin-collection book. How many pages can he fill if he has 56 coins? \_\_\_\_\_ pages

FACT

2. Jenna has 63 photos to put on 9 pages of her album. How many pictures can she put on a page? \_\_\_\_\_ pictures

FACT

3. Concetta reads 5 pages in her book each night. If she has read 40 pages, how many days has she been reading? \_\_\_\_\_ days

FACT

4. How many batches of grape jelly can Aunt Emma make if it takes 3 quarts of grapes to make one batch and she has 17 quarts of grapes? \_\_\_\_\_ batches  
Will Aunt Emma have any grapes left over? \_\_\_\_\_  
If so, how much? \_\_\_\_\_

FACT

5. Every year, the United States Mint releases 5 new state quarters. Kim has been collecting every year. She now has 30 coins in her collection. How many years has she been collecting the coins? \_\_\_\_\_ years

FACT

6. Mr. Rivera's class made bows to sell at the fund-raiser to pay for an upcoming field trip. Each bow needs 3 feet of ribbon. The ribbon comes in rolls of 18 feet. How many bows can the class make with each roll of ribbon? \_\_\_\_\_ bows

FACT

7. How many 9-cent stickers can you buy with 50 cents? \_\_\_\_\_  
How much change will you receive after you pay for stickers? \_\_\_\_\_¢

FACT

Name \_\_\_\_\_ Date \_\_\_\_\_

## Going From Here to There

**Directions:** You will be traveling from one number to another number. Your job will be to tell how you got from Here to There. You will either divide or multiply to go from one number to the other.

### Example

Here

How You  
Got There

There

10

÷ 2

5

You start out **Here** with number 10 and then travel to **There**: the number 5.  
How did you get to **There**? You **divided** the number 10 by 2!

Here

How You  
Got There

There

- |     | Here | How You<br>Got There | There |
|-----|------|----------------------|-------|
| 1.  | 6    | _____                | 3     |
| 2.  | 20   | _____                | 4     |
| 3.  | 4    | _____                | 1     |
| 4.  | 5    | _____                | 25    |
| 5.  | 15   | _____                | 5     |
| 6.  | 7    | _____                | 63    |
| 7.  | 3    | _____                | 9     |
| 8.  | 7    | _____                | 56    |
| 9.  | 6    | _____                | 48    |
| 10. | 14   | _____                | 7     |

Here

How You  
Got There

There

- |  | Here | How You<br>Got There | There |
|--|------|----------------------|-------|
|  | 32   | _____                | 8     |
|  | 4    | _____                | 32    |
|  | 36   | _____                | 9     |
|  | 3    | _____                | 18    |
|  | 40   | _____                | 8     |
|  | 8    | _____                | 72    |
|  | 28   | _____                | 4     |
|  | 6    | _____                | 30    |
|  | 21   | _____                | 7     |
|  | 6    | _____                | 42    |

# ÷ PRACTICE

## Find the Triplets

**Directions:** Draw a ring around the division combinations that are triplets—all three must have the same answer. Look closely, though, because some groups may have twins but not triplets. Find and circle all 10 sets of triplets.

Example

$$12 \div 4 = \underline{3}$$

$$6 \div 2 = \underline{3}$$

$$21 \div 7 = \underline{3}$$

$$6 \div 1 = \underline{1}$$

$$6 \div 2 = \underline{3}$$

$$6 \div 3 = \underline{2}$$

- |     |                                 |                                 |                                 |
|-----|---------------------------------|---------------------------------|---------------------------------|
| 1.  | $10 \div 5 = \underline{\quad}$ | $4 \div 2 = \underline{\quad}$  | $8 \div 8 = \underline{\quad}$  |
| 2.  | $30 \div 6 = \underline{\quad}$ | $45 \div 9 = \underline{\quad}$ | $20 \div 4 = \underline{\quad}$ |
| 3.  | $4 \div 4 = \underline{\quad}$  | $9 \div 9 = \underline{\quad}$  | $0 \div 1 = \underline{\quad}$  |
| 4.  | $0 \div 8 = \underline{\quad}$  | $0 \div 5 = \underline{\quad}$  | $0 \div 1 = \underline{\quad}$  |
| 5.  | $18 \div 6 = \underline{\quad}$ | $3 \div 1 = \underline{\quad}$  | $9 \div 3 = \underline{\quad}$  |
| 6.  | $28 \div 7 = \underline{\quad}$ | $8 \div 2 = \underline{\quad}$  | $32 \div 8 = \underline{\quad}$ |
| 7.  | $6 \div 6 = \underline{\quad}$  | $8 \div 8 = \underline{\quad}$  | $1 \div 1 = \underline{\quad}$  |
| 8.  | $24 \div 6 = \underline{\quad}$ | $24 \div 8 = \underline{\quad}$ | $24 \div 4 = \underline{\quad}$ |
| 9.  | $42 \div 7 = \underline{\quad}$ | $36 \div 6 = \underline{\quad}$ | $48 \div 8 = \underline{\quad}$ |
| 10. | $24 \div 6 = \underline{\quad}$ | $20 \div 5 = \underline{\quad}$ | $16 \div 4 = \underline{\quad}$ |
| 11. | $45 \div 5 = \underline{\quad}$ | $9 \div 1 = \underline{\quad}$  | $36 \div 4 = \underline{\quad}$ |
| 12. | $14 \div 2 = \underline{\quad}$ | $28 \div 4 = \underline{\quad}$ | $35 \div 7 = \underline{\quad}$ |
| 13. | $21 \div 3 = \underline{\quad}$ | $35 \div 5 = \underline{\quad}$ | $28 \div 4 = \underline{\quad}$ |
| 14. | $48 \div 6 = \underline{\quad}$ | $40 \div 5 = \underline{\quad}$ | $8 \div 1 = \underline{\quad}$  |
| 15. | $81 \div 9 = \underline{\quad}$ | $9 \div 9 = \underline{\quad}$  | $18 \div 2 = \underline{\quad}$ |

# ÷ PRACTICE

Name \_\_\_\_\_ Date \_\_\_\_\_

## Fill the Holes

**Directions:** Find the holes in each chart. Fill in the missing factor. The first one has been done for you.

1.

Factor	5	6		9	2			1	
Factor	5		3			7	4		6
Product	25	0	18	72	14	28	36	9	54

2.

Factor	7		1			5	8	9	
Factor		8		7	4				2
Product	21	16	1	0	20	30	64	63	12

3.

Factor	6	4	9			1		7	
Factor				5	7		2		3
Product	24	32	9	0	35	8	18	42	27

# ÷ PRACTICE

Name \_\_\_\_\_ Date \_\_\_\_\_

## What's Missing?

**Directions:** In each item below, one number is missing. Use division to find each missing factor and fill in the multiplication fact.

### Examples

$$6 \times \underline{4} = 24$$

$$\underline{8} \times 8 = 64$$

$$\underline{7} \times 7 = 49$$

1.  $2 \times \underline{\quad} = 8$

$7 \times \underline{\quad} = 7$

$\underline{\quad} \times 9 = 27$

2.  $\underline{\quad} \times 5 = 10$

$\underline{\quad} \times 3 = 18$

$8 \times \underline{\quad} = 0$

3.  $8 \times \underline{\quad} = 8$

$4 \times \underline{\quad} = 36$

$\underline{\quad} \times 3 = 21$

4.  $4 \times \underline{\quad} = 24$

$3 \times \underline{\quad} = 6$

$\underline{\quad} \times 7 = 56$

5.  $\underline{\quad} \times 6 = 42$

$\underline{\quad} \times 6 = 30$

$8 \times \underline{\quad} = 48$

6.  $9 \times \underline{\quad} = 45$

$\underline{\quad} \times 5 = 25$

$4 \times \underline{\quad} = 16$

7.  $3 \times \underline{\quad} = 0$

$\underline{\quad} \times 9 = 0$

$\underline{\quad} \times 2 = 18$

**Directions:** Now use the digits below to form division facts.

**Hint:** Some digits need to be combined to make two-digit numbers in a division fact.

### Example

1, 2, 3, 4  $12 \div 4 = 3, 12 \div 3 = 4$

1. 0, 2, 4, 5

2. 3, 6, 7, 9

3. 0, 0, 3

4. 1, 2, 4, 7

5. 4, 7, 7, 9

6. 1, 3, 5, 5

7. 1, 8, 9, 9

Name \_\_\_\_\_ Date \_\_\_\_\_

## The Right Location

**Directions:** Put each of the division combinations in the right location—under the correct quotient (1 through 9). Cross out the three combinations that do not belong in any location. The first one has been done for you.

### Combinations

$18 \div 3 = 6$	$0 \div 5$	$27 \div 3$	$30 \div 6$	$27 \div 9$
$9 \div 9$	$40 \div 5$	$36 \div 4$	$16 \div 8$	$35 \div 5$
$21 \div 3$	$36 \div 9$	$12 \div 6$	$7 \div 7$	$0 \div 1$
$4 \div 4$	$45 \div 5$	$24 \div 6$	$9 \div 3$	$28 \div 7$
$20 \div 4$	$8 \div 1$	$49 \div 7$	$30 \div 5$	$0 \div 9$
$32 \div 4$	$18 \div 9$	$36 \div 6$	$18 \div 6$	$25 \div 5$

# Finding Left-out Louie

**Directions:** Left-out Louie is the only number in the grid not used to answer any of the division combinations below. Can you find him? Cross out numbers in the grid when you use them as answers.

9	5	<del>7</del>	4	5
7	9	5	9	7
9	8	4	7	8
7	9	7	6	7
3	9	5	6	9

## Example

1.  $14 \div 2 = 7$

2.  $25 \div 5 = \underline{\hspace{1cm}}$

3.  $56 \div 8 = \underline{\hspace{1cm}}$

4.  $21 \div 3 = \underline{\hspace{1cm}}$

5.  $35 \div 5 = \underline{\hspace{1cm}}$

6.  $45 \div 9 = \underline{\hspace{1cm}}$

7.  $63 \div 7 = \underline{\hspace{1cm}}$

8.  $36 \div 4 = \underline{\hspace{1cm}}$

9.  $15 \div 5 = \underline{\hspace{1cm}}$

10.  $24 \div 4 = \underline{\hspace{1cm}}$

11.  $81 \div 9 = \underline{\hspace{1cm}}$

12.  $30 \div 6 = \underline{\hspace{1cm}}$

13.  $32 \div 8 = \underline{\hspace{1cm}}$

14.  $72 \div 8 = \underline{\hspace{1cm}}$

15.  $16 \div 4 = \underline{\hspace{1cm}}$

16.  $48 \div 6 = \underline{\hspace{1cm}}$

17.  $40 \div 8 = \underline{\hspace{1cm}}$

18.  $27 \div 3 = \underline{\hspace{1cm}}$

19.  $49 \div 7 = \underline{\hspace{1cm}}$

20.  $28 \div 4 = \underline{\hspace{1cm}}$

21.  $54 \div 6 = \underline{\hspace{1cm}}$

22.  $42 \div 6 = \underline{\hspace{1cm}}$

23.  $56 \div 7 = \underline{\hspace{1cm}}$

24.  $18 \div 3 = \underline{\hspace{1cm}}$

When you find Left-out Louie, write his number here. \_\_\_\_\_

## Who Gets the Most Prizes?

**Directions:** Mrs. Nuwambi told the class that she would give division problems, and anyone who solved them would get a prize for every number left over. Alan, Bailey, and Carrola volunteered. The chart below shows the problems each student got. Your job is to see which student got the most prizes.

Solve each problem and write what is left. Add all the leftovers in each column.

	Alan	Bailey	Carrola
1.	$10 \div 3 = \underline{3} \text{ r } \underline{1}$	$65 \div 8 = \underline{\quad} \text{ r } \underline{\quad}$	$32 \div 5 = \underline{\quad} \text{ r } \underline{\quad}$
2.	$14 \div 6 = \underline{\quad} \text{ r } \underline{\quad}$	$29 \div 6 = \underline{\quad} \text{ r } \underline{\quad}$	$16 \div 5 = \underline{\quad} \text{ r } \underline{\quad}$
3.	$32 \div 5 = \underline{\quad} \text{ r } \underline{\quad}$	$41 \div 5 = \underline{\quad} \text{ r } \underline{\quad}$	$45 \div 7 = \underline{\quad} \text{ r } \underline{\quad}$
4.	$50 \div 7 = \underline{\quad} \text{ r } \underline{\quad}$	$10 \div 4 = \underline{\quad} \text{ r } \underline{\quad}$	$25 \div 8 = \underline{\quad} \text{ r } \underline{\quad}$
5.	$26 \div 5 = \underline{\quad} \text{ r } \underline{\quad}$		$9 \div 4 = \underline{\quad} \text{ r } \underline{\quad}$
6.	$81 \div 9 = \underline{\quad} \text{ r } \underline{\quad}$		
Total Leftovers (Remainders)	<u>          </u>	<u>          </u>	<u>          </u>

Who got the most prizes? \_\_\_\_\_

Who got the fewest? \_\_\_\_\_

Name \_\_\_\_\_

## Pick a Pair of Pears

**Directions:** Pick a pair of pears that would make a division fact with one of the given answers. Write each number on a line. You may use the numbers more than once.

### Example

1.  $8 \div 4 = 2$

2.  $\underline{\quad} \div \underline{\quad} = 2$

3.  $\underline{\quad} \div \underline{\quad} = 2$

4.  $\underline{\quad} \div \underline{\quad} = 3$

5.  $\underline{\quad} \div \underline{\quad} = 3$

6.  $\underline{\quad} \div \underline{\quad} = 3$

7.  $\underline{\quad} \div \underline{\quad} = 4$

8.  $\underline{\quad} \div \underline{\quad} = 4$

9.  $\underline{\quad} \div \underline{\quad} = 4$

10.  $\underline{\quad} \div \underline{\quad} = 5$

11.  $\underline{\quad} \div \underline{\quad} = 5$

12.  $\underline{\quad} \div \underline{\quad} = 6$

13.  $\underline{\quad} \div \underline{\quad} = 6$

14.  $\underline{\quad} \div \underline{\quad} = 7$

15.  $\underline{\quad} \div \underline{\quad} = 8$

16.  $\underline{\quad} \div \underline{\quad} = 9$
